

Amendments to the Claims:

Please cancel claims 4, 8-9, 20-21, 29-30, 34, and 38 and amend claims 1, 10, 25, and 31 as follows. This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A solid formulation comprising at least one antibody, histidine, and arginine, wherein the concentration of histidine is about 15 mM and the concentration of arginine is about 15 mM.
2. (Previously presented) The solid formulation of Claim 1, further comprising at least one additional excipient.
3. (Previously presented) The solid formulation of Claim 2, wherein said at least one additional excipient is selected from the group consisting of: mannitol, Polysorbate 20, Polysorbate 80, succinate, citrate, Tris, phosphate, sucrose, trehalose, amino acids, polyols, polyethylene glycol, bovine serum albumin, sucrose, lactose, maltose, and sorbital.
4. (Cancelled)
5. (Original) The solid formulation of Claim 1, wherein said at least one antibody is a mammalian antibody.
6. (Original) The solid formulation of Claim 1, wherein said at least one antibody is a human antibody.
7. (Original) The solid formulation of Claim 1, wherein said at least one antibody is a human monoclonal IgG₂ antibody.
- 8-9. (Cancelled)

10. (Withdrawn-Currently Amended) A method of preparing an antibody in a solid formulation according to claim 1, comprising:

mixing at least one antibody with ~~a stabilizing amount~~ about 15 mM of histidine and about 15 mM arginine to form a mixture; and treating said mixture to generate a solid formulation of said antibody and said histidine.

11. (Withdrawn) The method of Claim 10, wherein treating said mixture comprises lyophilizing said mixture.

12. (Withdrawn) The method of Claim 10, wherein solid formulation is a lyophilized cake.

13. (Withdrawn) The method of Claim 11, wherein lyophilizing said mixture comprises:

freezing said mixture at a rate of about -0.35° C per minute said mixture reaches a temperature of about -45°; and

sufficiently drying said mixture.

14. (Withdrawn) The method of Claim 13, wherein drying comprises a primary and a secondary drying.

15. (Withdrawn) The method of Claim 12, further comprising reconstituting said lyophilized cake with a reconstituting agent.

16. (Withdrawn) The method of Claim 15, wherein said reconstituting agent comprises water for injection (WFI).

17. (Withdrawn) The method of Claim 10, further comprising adding at least one other excipient to said mixture.

18. (Withdrawn) The method of Claim 17, wherein said at least one other excipient is selected from the group consisting of: mannitol, Polysorbate 20, Polysorbate 80, succinate, citrate, Tris, phosphate, trehalose, amino acids, polypols, PEG, BSA, sucrose, lactose, maltose, and sorbital.

19. (Withdrawn) The method of Claim 15, wherein said at least one other excipient is arginine.
- 20-21. (Cancelled)
22. (Withdrawn) The method of Claim 11, wherein lyophilizing said mixture occurs in less than 100 hours.
23. (Withdrawn) The method of Claim 11, wherein lyophilizing said mixture occurs in less than 50 hours.
24. (Withdrawn) The method of Claim 11, wherein lyophilizing said mixture occurs in less than 45 hours.
25. (Currently Amended) A kit for preparing a solid formulation of a stabilized antibody comprising;
- a first container, comprising at least one antibody in solution; and
- a second container comprising a sufficient amount of histidine in solution to stabilize said antibody when said antibody is dried into a solid formulation and further comprising arginine,
- wherein the concentration of histidine is about 15 mM and the concentration of arginine is about 15 mM.
26. (Original) The kit of Claim 25, wherein said antibody is a mammalian antibody.
27. (Original) The kit of Claim 25, wherein said antibody is a human antibody.
28. (Original) The kit of Claim 25, wherein said antibody is a human monoclonal IgG₂ antibody.
- 29-30. (Cancelled)
31. (Currently Amended) A liquid formulation comprising at least one antibody, histidine in a concentration of about 15 mM ~~less than 30 mM~~, and arginine in a concentration of about 15 mM.

32. (Previously presented) The liquid formulation of Claim 31, further comprising at least one additional excipient.

33. (Previously presented) The liquid formulation of Claim 32, wherein said at least one additional excipient is selected from the group consisting of: mannitol, Polysorbate 20, Polysorbate 80, succinate, citrate, Tris, phosphate, sucrose, trehalose, amino acids, polypols, polyethylene glycol, bovine serum albumin, sucrose, lactose, maltose, and sorbital.

34. (Cancelled)

35. (Original) The liquid formulation of Claim 31, wherein said at least one antibody is a mammalian antibody.

36. (Original) The liquid formulation of Claim 31, wherein said at least one antibody is a human antibody.

37. (Original) The liquid formulation of Claim 31, wherein said at least one antibody is a human monoclonal IgG₂ antibody.

38-39. (Cancelled)

40. (Previously presented) The solid formulation of claim 1, wherein said antibody is a recombinant antibody.

41. (Previously presented) The solid formulation of claim 1, wherein said antibody is an immunospecific antibody fragment.

42. (Previously presented) The solid formulation of claim 1, wherein said antibody is present in a concentration of from about 5 mg/mL to about 100 mg/mL.

43. (Previously presented) The kit of Claim 25, wherein said antibody is a recombinant antibody.

44. (Previously presented) The kit of Claim 25, wherein said antibody is an immunospecific antibody fragment.

45. (Previously presented) The kit of Claim 25, wherein said antibody is present in a concentration of from about 5 mg/mL to about 100 mg/mL.
46. (Previously presented) The liquid formulation of Claim 31, wherein said antibody is a recombinant antibody.
47. (Previously presented) The liquid formulation of Claim 31, wherein said antibody is an immunospecific antibody fragment.
48. (Previously presented) The liquid formulation of claim 31, wherein said antibody is present in a concentration of from about 5 mg/mL to about 100 mg/mL.
